

Fairfield School of Business

MSc Strategic Marketing and Analytics

Enhance your digital marketing knowledge and work side-by-side with industry and research-led staff.

You will work on the latest research developments, while industry speakers provide development opportunities to enrich your creative and digital business practice. This will significantly contribute to your university experience and preparation for professional practice.

The curriculum revolves around contemporary digital marketing practice and emerging trends in the digital world. Students on the course will delve into the likes of data analytics, strategic marketing, social media trends and innovative research practice and exploring the dynamics of marketing on a global scale.

How will I be assessed?

The programme uses a wide range of assessment methods. Formative assessments will be used to monitor your progress on the course and enable your tutors to identify any support needs you may have prior to undertaking your summative assessments.

The assessment portfolio includes case study analysis, formal examinations, individual and group business reports, oral and poster presentations, multiple choice questions, individual research projects and so on. Clear assessment criteria enable you to evaluate your progress and identify areas for further improvement and development.
